SOFTWARE ENGINEERING PROJECTS

Software Engineering Immersive | General Assembly   October 2022 - February 2023
Successfully completed 500+ hours of expert-led instruction in JavaScript, React, Python and hands-on learning of computer science fundamentals and the industry's most in-demand technologies. Developed projects include:

Tamagotchi Project: CSS, HTML5, and Javascript6
- Built a small pet game using HTML and Javascript where the user is able to play with the pet and have the pet grow to adulthood.

Foodie: CSS, HTML5, and Javascript6, REACT, Express, NodeJS
- Built a frontend application with a partner where you can search for and find the best restaurants in a specific city and with this application you are given suggestions by the app.
- Built restaurant page using CSS to display the details of the restaurant such as the restaurant's address, name, phone number, etc.

Whatsapp: CSS, HTML5, and Javascript6, REACT, MongoDB, Express, NodeJS
- Created a MERN Stack Whatsapp clone where users can message and communicate with each other.
- Created that backend of the Whatsapp clone using MongoDB, Express, Node.js, and made restful routes.

PROFESSIONAL EXPERIENCE

Theory Livermore Outlet   August 2019 - April 2020
Support Associate, Livermore, CA
- Maintained a clean and organized stockroom to ensure efficient item retrieval, resulting in breaking the store's record of total sales in a month.
- Supported customers with their needs by making sales to clients when other sales representatives were unavailable.

EXTRACURRICULAR ACTIVITIES

Football CV Academy   June 2014 - May 2016

Goalkeeper, Stamford, England

- Trained full-time 10 hours a day for 5-6 days a week to pursue becoming a professional soccer player.
- Communicated with teammates from various cultures and countries to win games against other academy teams all throughout Europe.

EDUCATION

General Assembly, Remote

Certificate, Software Engineering Immersive (SEI)   February 2023
